CONTROL EQUIPMENT

**Meyer**<sup>®</sup>  
**E-70**  
Out-Front Hydraulics

THE BEST BUILT,  
BEST BACKED PLOWS  
IN THE INDUSTRY.

# It's what's out front that counts.

**It's new, it's here and it's right in front of you – E-70 Out-Front Hydraulic System from Meyer<sup>®</sup> Products.** Designed to be easily installed and fit a wide variety of vehicles, Meyer Products' E-70 Out-Front Hydraulics is the perfect solution for landscapers or contractors that want to add a plow to vehicles that do not have central hydraulics. The Meyer E-70 Out-Front Hydraulic unit is used with Road Pro™ moldboards, the biggest and toughest plow in the Meyer line and perfect for 27,000 lb. to 33,000 lb. GVW municipal trucks.

The Meyer® E-70 Out-Front Hydraulic System works with the Road Pro™ moldboard. At 9' or 10' wide, 36" tall, and weighing 1600 lbs, the Road Pro is the biggest and toughest plow in the Meyer line. A taller moldboard, more aggressive attack angle and precise curvature create superior snow rolling action so you can move more snow in less time. The Road Pro is available in full-trip steel or polyethylene or Meyer Diamond Edge bottom-trip steel.

**E-70 Out-Front Hydraulics** can be used with Class IV – Class VII vehicles including:

650, 750

6500, 7500, 8500

4200, 4300, 4400

M2

Acterra

443

T-300

6500, 7500, 8500

## E-70 Features

Large translucent reservoir allows for easy filling and the ability to check oil level at a glance.

The Meyer E-70 unit uses #10 cartridges and solenoids with 1/2" hoses to provide maximum flow and operational speed. (Shown with cover removed.)

When the plow is removed hoses do not need to be disconnected eliminating the potential for oil contamination.

### PART NO. DESCRIPTION

15825	E-70 OUT-FRONT HYDRAULIC SYSTEM
