

Meyer®

Liquid Applicators

Get the advantage over ice with Meyer Anti-icers

Meyer Anti-icers are designed for the rigors of landscapers and municipalities looking to pre-treat roads, parking lots and intersections before the arrival of snow storms. Pre-treatment helps granular material work quickly by forming a brine to better adhere to the road. Available in 295 and 550 gallon capacities, Meyer Anti-icers feature a unique variable orifice nozzle designed to minimize material use with an instant on/off variable speed controller mounted inside the cab. Available with gas or hydraulic drive options.

Meyer Anti-icers
are available in 295 gallon
(shown above) and 550 gallon
capacities (left)

Meyer Anti-icers have many standard features that are options on competitive models. They fit vehicles with GVW ratings from 6,001 lbs - 26,000 lbs and are attached by using a hold-down kit or direct mount bolt through the frame to the truck bed.

Quick coupler bar

For quick liquid transfer when unloading into a transfer tank or storage container.

Self storing leg stands

Provides for fast removal and storage of spray system when not in use.

Standard Features

50-foot spray reel

Allows anti-icing in areas that vehicles can't reach such as sidewalks and steps.
