

Easily attaches to tractors, skid steers, and compact wheel loaders using a standard universal plate system.

<b>Blade type</b>	Push plow with back-drag capability
<b>Moldboard length</b>	8' minimum to 12' maximum
<b>Height</b>	36"
<b>Weight</b>	2109 lbs
<b>Cutting edge</b>	1" thick rubber standard
<b>Rams</b>	Heavy-duty dual-acting rams for wing extension
<b>Cylinder size</b>	2-1/2" x 22"
<b>Steel thickness of wings</b>	0.25"
<b>Steel thickness of main plow</b>	0.25"
<b>Features</b>	Expanding push plow, back-drag capable, ground tracking, durable polyethylene slides for smooth, consistent operation

Expands  
 anywhere from  
 8' - 12'

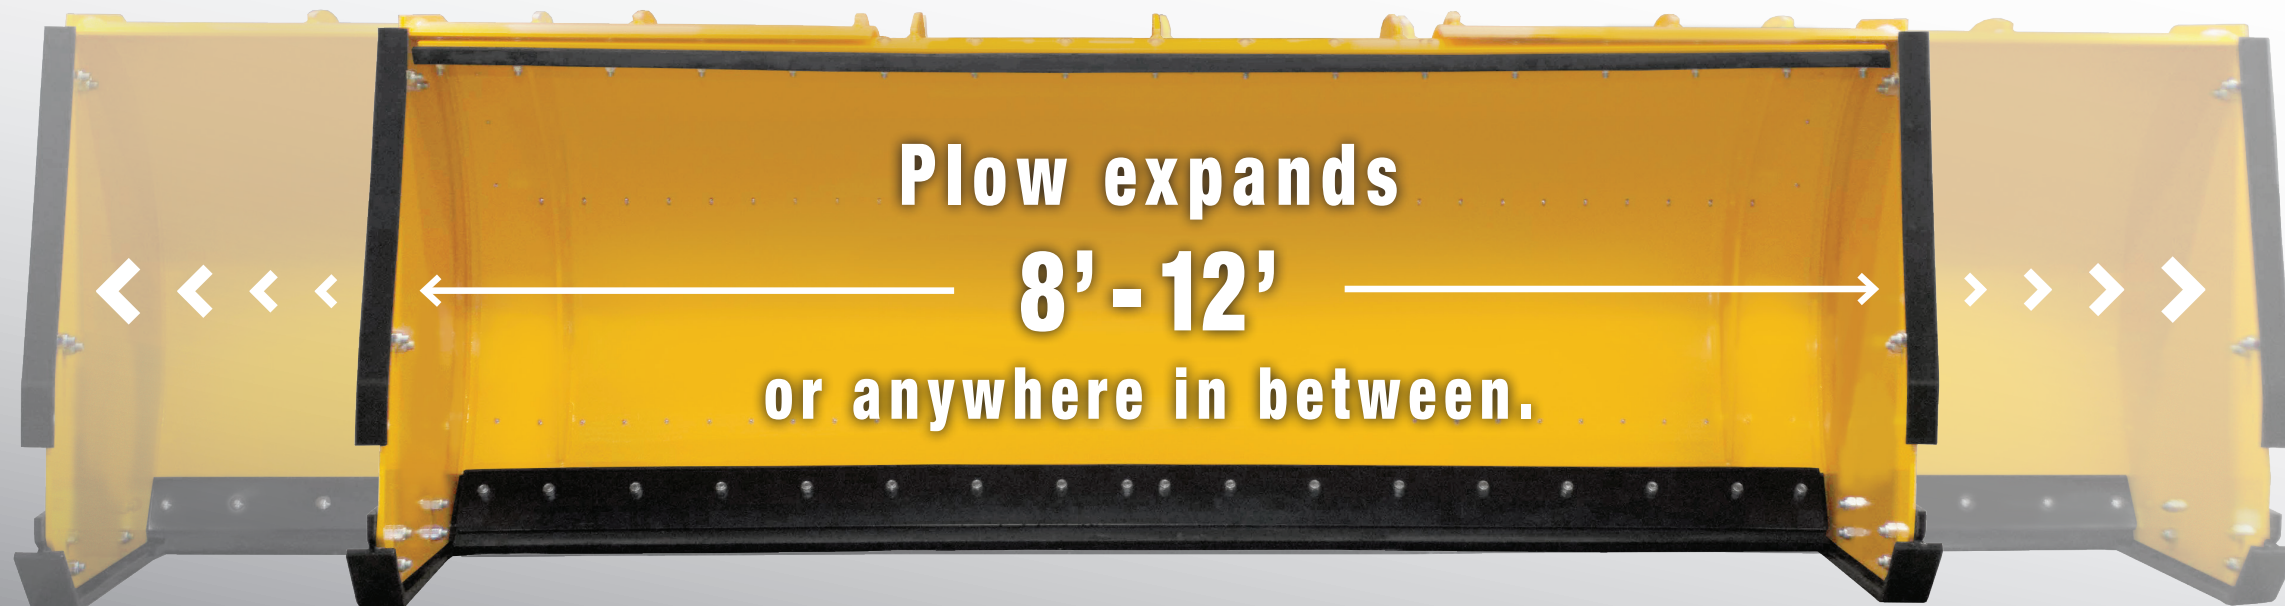

# Save time with the most versatile box plow.

Using your machine's controls, the Power Box's patented hydraulic wings expand the plow as wide as you need, anywhere from 8' to 12', perfect for narrow areas and open lots. The Meyer Power Box also flips over for more effective back-dragging of snow, mud, manure and more. With Power Box, nothing can stop you.

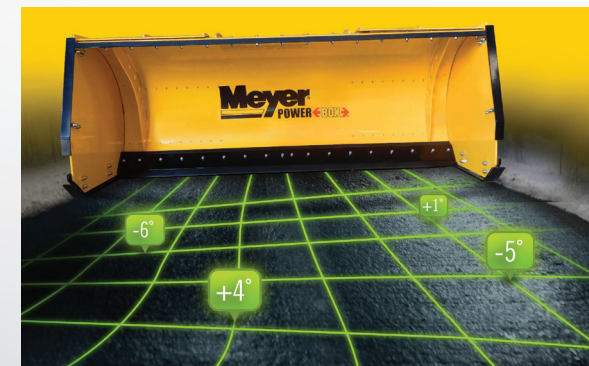

Self-lubricating adjustable wings mean no maintenance, just sure and easy operation, and a long service life.

Strongest moldboard in the industry thanks to 1/4" thick steel, slot and tab construction, and laser cut ribs -- won't twist and turn.

Collapsed mode means safer transport when moving on to the next job.

Ground Tracking Technology™ allows box plow to free-float 20 degrees and clear more snow off uneven contours.

Aggressive design to capture snow in the most efficient manner possible.

Rubber cutting edge is standard for quieter operation on multiple surfaces.
