

# TIMBREN SES

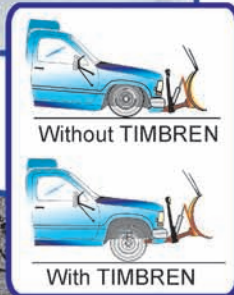

Suspension Enhancement Systems

**HIGHLY RECOMMENDED BY PROFESSIONALS  
AND GOVERNMENTS FOR ALL SNOW REMOVAL  
EQUIPMENT TO GET THE JOB DONE...**

RIDE QUALITY PRODUCTS

- Since the Aeon® Hollow Rubber Springs carry most of the added load, your truck suspension will last longer.
- Reduced maintenance costs and less downtime are particularly important to Meyer snowplow operators.
- Eliminate the high cost and harsh ride caused by adding leaf springs or helper springs to carry rear mounted / top heavy spreaders.
- Timbren has a complete line of front and rear suspension stabilizer kits.

*Timbren Ride Quality Products have added stability to trucks, vans and RVs for over 40 years.*

- How can Timbren offer you the best of both worlds..?
  - Extra capacity when the Meyer plow is mounted
  - A smooth ride at all times
- When the Meyer snowplow is installed, powerful Aeon® hollow rubber springs progressively carry the additional weight, preventing spring sag and bottoming out.
- The design of the Timbren kit and the progressive rate of the Aeon® spring mean that there is no interference with the normal activity of the suspension when the Meyer snowplow is removed.
