

# Nite Saber® II Lights Outshine The Competition

## Meyer Nite Saber Lights vs. The Competition

### Low Beam and High Beam Light Output

- Nite Saber II
- Nite Saber I
- Competitor A
- Competitor B

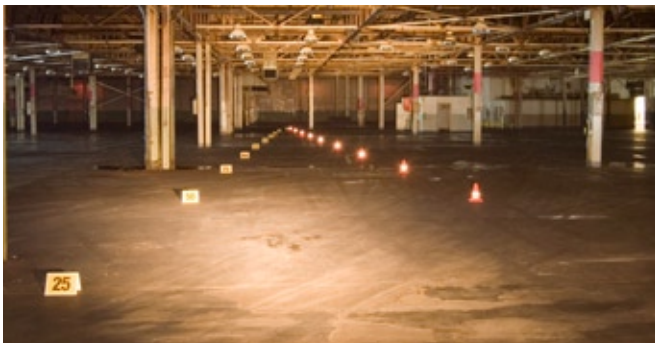

Test conducted by Hamsar Diversco Inc.

**Others say their lights are the best...  
but *we have the proof.***

Recent tests have shown, Nite Saber II's operated on low-beam, are brighter than any competitor, especially in the center area that is the most critical when plowing. High beam test results prove the optical clarity of the Nite Saber II's lens is unmatched in all viewing zones versus the competition.

**Working over time.**

Unretouched images showing the difference in light output of Nite Saber II's versus the nearest competitor.

**Nite Saber II — high beam**

**The Competition — high beam**

Optional Nite Saber® II Lights use state-of-the-art design to maximize visibility and safety.

With advanced features and state-of-the-art design, Meyer Nite Saber II lights make it easier and safer than ever before.

It's no wonder they outshine the competition.

#### Features Include:

- 1 Four head lamp system**, advanced complex reflectors and high output harnessing, Nite Saber II Lights provide a far superior forward and right curbside beam pattern for safer, easier and more productive plowing.
- 2 Complex reflector headlight system** uses "Clear Lens Optics" which allows more light energy from the headlight bulb to be used to light the road.
- 3 Wrap-around turn signal design** makes it easier for other motorists to see you when plowing or driving.
- 4 Large access rear door** makes it easy to replace bulbs when necessary.
- 5 High output harnessing system** ensures that maximum electrical energy is transmitted to the headlight system.
- 6 180-degree adjustable stainless steel bracket** that reduces vibration while maintaining maximum lighting in all weather condition.
