meyer Super Blade

Everybody's expectations are high. Your customers. Your crew. Your community. Whenever and wherever the snow flies, immediate response is your job. How do you get it done? With dedication, grit, determination, and Meyer. Because Meyer engineers a powerful selection of contractor-grade snow and ice control equipment built to the highest standards in the industry: Yours. Nobody is more dedicated to getting it done than you. And nobody is more dedicated to make sure you have what it takes than Meyer.

Meyer® leads the industry with contractor-focused features like:

Moldboard Height/Angle

The tallest moldboards with the most aggressive attack angle in contractor-grade plows.

Ground Clearance

Industry-leading ground clearance for less chance of bottoming out and higher stacking.

Pistol Grip

The Meyer-exclusive pistol grip controller with self-diagnostics allows the driver to precisely control the blade quickly and diagnose performance issues in real time. The pistol grip controller also offers Hands-Free Plowing (HFP), which uses the shift lever to control the up/ down movement of the blade, and double-click technology which means you can double-click a button and the blade automatically moves in that direction without having to keep your finger on the button.

Hydraulic Systems

All Meyer hydraulic systems come standard with a custom-molded cover to protect the hydraulics from road salt and grime. It also features an adjustable drop speed for more driver control and to keep the plow from slamming down.

Nite Saber® Lights

Nite Saber LED Lights to light the darkest night. They're fully adjustable and mounted to resist vibration.

Two-Piece Plug

Simple two-piece plug that makes connecting and disconnecting faster and easier.

Fleet Friendly

Meyer Standard Operating System V-plows and straight plows are fleet friendly. The V-plow and straight blades are interchangeable so the driver can easily switch out a Meyer V-blade with a Meyer straight blade when using the V-plow controller.

YFARS

AMERICA'S

WARRANTY

Tubular Steel

All Meyer Push- and A-frames are constructed with tubular steel, making them stronger than angle iron sector frames.

5-Year Warranty

All Meyer Plows are backed by a 5-Year Warranty, the longest and strongest in the industry.

Super Blade[™] Extend your capabilities

The all new commercial-grade Super Blade is bigger and stronger than any other automatically adjustable plow on the market.

With the press of a button, you can **expand from 8' to 10.5' and back again,** or anywhere in between. The wings extend as a pair, or independently, at your command.

The Super Blade is 32" high in the center of the moldboard, while the outer adjustable wings measure 36" high, giving you unprecedented plowing efficiency. For added strength and reliability, the Super Blade features a tubular pivot bar, with a heavy-duty center support, running the entire length of the critical snow impact area of the blade. And the wings are reinforced with ribs to let you take on the toughest plowing jobs worry-free.

Super Blade Specifications

Model	SB 8-10
Part #	53300
Blade Type	Full-Trip
Moldboard Length	8' - 10' 6"
Moldboard Height	32" - 36"
Moldboard Gauge	12 Steel
Vertical Ribs	9
Plow Trip Springs	6
Cutting Edge	1/2" x 6"
Average Width at Full Angle	87" - 111"
Angling Rams	2" x 10"
Complete Weight	1175 lbs.

AMERICA'S BEST WARRAINTY

Drive Pro[™] Clear driveways start here

As manufacturers of 1/2-ton pick-ups keep offering lighter-weight models, Meyer has developed a rugged snow **plow made of lightweight, high-strength steel.**

The Drive Pro offers commercialgrade plow construction and performance in a size that's **perfect for driveways and other tight residential areas.**

The Drive Pro offers powerful performance features like field-adjustable trip springs and an easy-on/easy-off single-pull pin mount that leaves the vehicle with a showroom appearance when not plowing. All Drive Pro models feature Meyer Nite Saber III lights.

Lot Pro[™] LD

Be fully armed with a 1/2-ton truck

The Lot Pro LD gives residential contractors a powerful tool to provide superior service to their customers. It's **engineered specifically for ½-ton trucks** with snow plow prep packages. Combining light weight and commercial-grade toughness, the Lot Pro LD can handle tight spaces and long driveways easily. With a **28**" **tall moldboard and 75-degree attack angle**, it clears more snow fast, plus it offers outstanding back dragging performance thanks to its **heavy-duty rams.**

To ensure contractors are working with the best, every Lot Pro LD is engineered with Meyer's Reliable Over-time Construction (ROC), an industry-leading manufacturing process that deploys state-of-the-art technology to make our plows more rugged and reliable.

Lot Pro LD Specifications

Lot Pro^{TM} More rugged, by a lot

Ready for action 24/7, the Meyer Lot Pro gives you a rugged partner to clear large parking lots whenever your customers call.

Made with highway plow type black iron, Lot Pros are in it for the long haul. They're made with Meyer's Reliable Over-time Construction (ROC), a stringent manufacturing process that incorporates **state-of-the-art technology to ensure our plows are more rugged and reliable.**

The Lot Pro for ¾-ton+ trucks gets the job done fast with a **moldboard that stands 32 inches tall**, and an aggressive **75° attack angle** that also gives it superior back-dragging performance. Plus, it features **optional all-steel multi-position wings** that give you the ability to choose the best conformation for the job – box, scoop, or straight plow – by pulling a single pin.

Choose from a variety of blade lengths in carbon steel or poly.

Diamond Edge[™] Give your business a real edge

When you find yourself plowing heavy, wet snow, you need a plow solution you know you can count on. That's where the Meyer Diamond Edge Plow comes in. **This 32.5" tall plow features a 70° attack angle** to move more snow in less time than competitive contractor plows.

Engineered for 3/4-ton and larger pickup trucks, the Diamond Edge features a bottom-trip design so only the lower portion of the blade gives way minimizing load loss and keeps you plowing. Plus, the trip edge absorbs and dissipates impact shock, minimizing wear and tear on the plow, truck and driver. And the Diamond Edge comes standard with a reversible cutting edge for extended plow life.

Super-V3[™]/Super-V3 LD[™]

Versatility at your command

The Super-V3 and Super-V3 LD feature a **bottom-trip design so only the lower portion of the blade gives way minimizing load loss**. The bottom-trip feature also absorbs the shock caused by obstructions, saving wear and tear on the driver, truck and plow. Super-V3s also feature an **exclusive upper-sealed center rubber deflector,** along with optional wing deflectors to keep snow and ice off your windshield, and a **lower-sealed center steel cutting edge** to eliminate snow trails.

Meyer Super-V3 plows bring you next-level V plow performance. **Available in carbon steel or stainless steel**, their independently controlled wings give you the flexibility to go from a V, scoop or straight-blade configuration with the press of a single button. The Meyer Super-V3 is engineered for ³/₄-ton and larger pickup trucks. The Super-V3 LD is ideal for ½-ton models.

Both let you clear snow faster than conventional V-plows thanks to their tapered wing design. They come standard with **locking double-acting cylinders** that let you back-drag snow more efficiently than ever.

Road Pro 32 Fits 10,000 – 26,000 lb. GVW Vehicles

Perfect for clearing side streets, parking lots and cul-de-sacs, the Road Pro 32 features flared wings and a scoop and funnel moldboard design to maximize snow rolling. It has 2" x 10" heavy-duty hydraulic rams and six trip springs to handle the punishment found in municipal applications.

For additional strength, Road Pro 32 moldboards are reinforced with **additional bracing and tubular steel** on the bottom third of the blade to reinforce the work zone.

Our hydraulic system allows you to add a Road Pro 32 to a vehicle without central hydraulics. If your vehicle has central hydraulics, the Road Pro 32 can be plumbed directly into the hydraulic system for easy installation and maintenance.

Road Pro 36 Fits 26,000 – 33,000 lb. GVW Vehicles

The Meyer Road Pro 36 brings you the strength you need to quickly and efficiently clear city streets and small rural neighborhoods.

Road Pro 36 moldboards are up to any job out there, constructed using

7-gauge steel or 3/8" polyethylene and backed by eight vertical ribs built on a massive black iron push frame. The Road Pro's six heavy-duty, fieldadjustable springs absorb road punishment to reduce wear and tear on both vehicle and driver, storm after storm. The Road Pro 36 has an **aggressive 65-degree attack angle** and **36-inch moldboard height** with 15" radial overhang to throw snow higher and farther.

Road Pro 36 plows feature a unique design that allows the moldboard to automatically pivot up to 5-degrees on each side to follow the contour of the road for faster, more efficient plowing action. Road Pro 36 plows are available in 9-foot, 10-foot or 11-foot full-trip lengths with available bottom trip. All Meyer bottom-trip moldboards are available with a reversible cutting edge for longer wear-life of your moldboard.
